Experience the unique natural & built environments of southern India!

“Sustainable Development: The Kerala experience”
3 credits, December 27, 2017 to January 14, 2018 (excluding travel days)

This is a unique international course open to students of environmental studies, sustainable development, urban planning, business, women's studies, geography, and related fields. This course will provide an extraordinary opportunity to travel to India, interact with highly acclaimed environment and development professionals, learn about many innovative sustainable development processes and techniques, and visit sites where those innovations have been used. All participants will develop a clear understanding of the conflicting challenges of economic development and environmental protection, and of culture, politics and the uneven geographies of opportunity in a developing country.

Cultural immersion activities will be interspersed between lectures and field visits. These would include visits to Padmanabhapuram Palace (a 500-year old wooden palace), to Kanyakumari (the confluence of three large water bodies, the Arabian Sea, the Bay of Bengal and the Indian Ocean) and to classical Indian dance performances. Get a first hand understanding of the history, culture and architecture of one of the oldest civilizations of the world.

Application deadline: September 20, 2017
Course: 2017-18 India Winterim
ABRD 3445, Section 0001
